

We're Planet DDS, Your Partner in Growth

PRACTICE MANAGEMENT | IMAGING | PRACTICE MARKETING

You could say that customers have always been the center of our universe.

Since 2003, we've built a reputation for fueling growth for our customers by developing innovative solutions to solve their biggest challenges. **Planet DDS is committed to being your partner in growth.**

A Unique Opportunity in Dental

The cloud has long been said to be the catalyst for growth, thanks to its near-limitless ability to scale.

Yet, for the vast majority of dental practices, the benefits of the cloud remain unrealized.

We're partnering with dental practices, groups, and DSOs to give them the superpower of using cloud solutions within their organizations.

Join the Growth Movement

More than 13,000 practices across the US are already growing their business outcomes, productivity, and patient care with Planet DDS solutions.

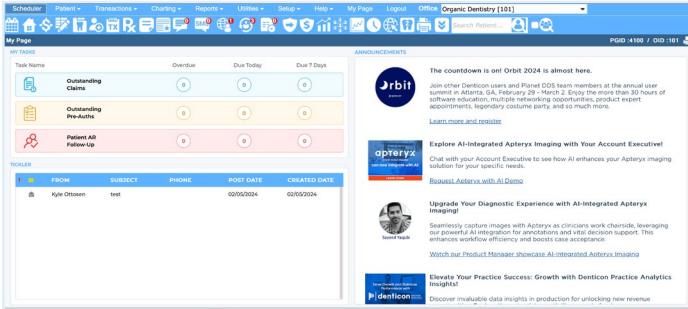

“ We partnered with Planet DDS early on as we prepared for growth. The **cloud-based system** is perfect for our diverse geography and central reporting structure. ”

RAY CARUSO | CEO of Lone Peak

Our Solutions

More practices trust Planet DDS cloud solutions to run their practices than any other dental cloud solutions provider.

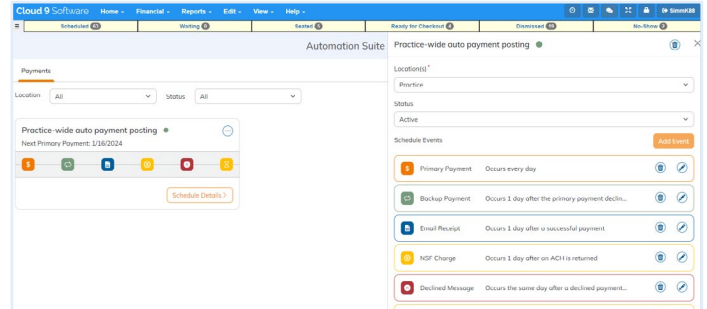

Denticon Practice Management

Denticon is the cloud-based dental practice management solution for growth-minded practices to increase efficiency, scale, and focus on patient care.

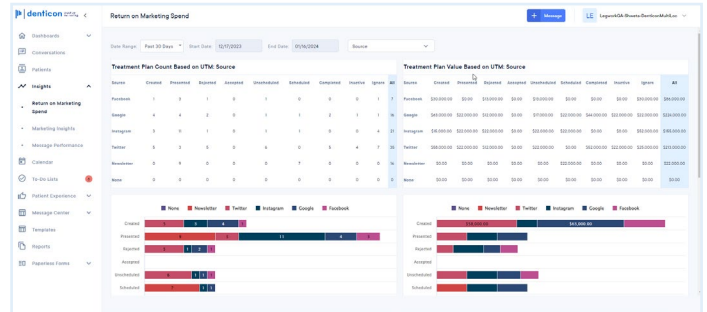

Apteryx Imaging

Apteryx is a robust cloud-based imaging solution that integrates seamlessly with virtually all imaging devices and your practice management solution.

Cloud 9 Orthodontic Practice Management

Elevate your ortho practice with the only fully cloud-based practice management solution designed exclusively for orthodontists.

Legwork Practice Marketing

A complete patient acquisition platform designed to grow your business and reputation with new and existing patients.

“Planet DDS is miles ahead of anyone in the space.”
