

## STANDARD DATA CONVERSION MAPPING

### System Source: **Curve Hero**

**Extraction Process:** Client to provide web address for accessing their data, along with the login name and password. PDDS to extract data from web using login information

Client must request scanned documents and images from Curve separately.

Practice Information	✗
Provider Information	✗
Users	✗
Medical History Form	✗

**PLEASE NOTE:** There is no fix for duplicate notes. The “tag” attached to the note tells us where to convert it to, and many notes have multiple tags. All clinical notes are hard coded to result into progress notes within Denticon. If custom mappings to map to patient notes are requested, additional programming will be needed, and programming fees could apply.
